

Secapur Perfect

Concentrated anionic drycleaning detergent for the application in perc

Properties:

- possesses an excellent water-emulsifying and water-binding properties
- reduces the post-spotting thanks to its good cleaning capacity
- also suitable for pre-spotting
- acts antistatic and reviving
- can be used as drycleaning detergent for work-clothes made of polyester and cotton in combination with water dosages

Application:

Stock solution

1 - 2 ml **Secapur Perfect** per L solvent in the work tank and filter
(0.15 - 0.25 fl oz/gal)

Topping-up additive

Single-bath method

At least 25 % liquor exchange (extraction to the still) or distillation of the entire liquor in the work tank at the latest after 10 loads = 2 ml **Secapur Perfect** / kg garments (0.3 fl oz/10 lbs)

Two-bath method

With at least 50 % liquor exchange (1st bath completely to the still) = 4 ml **Secapur Perfect** / kg garments (0.6 fl oz/10 lbs) into the 2nd bath

Application of **Secapur Perfect** as pre-brushing agent

Depending on the sensitiveness of the fabrics to be treated, the product is pre-sprayed or pre-brushed on heavily soiled areas pure or diluted with water. Be careful when using this product on delicate garments. In case of doubt (especially in case of suspected colour fading) we recommend to carry through a hem test.

More information on the process technology you can find in our brochure: "Use of Textile Care Agents in Dry-cleaning"

Technical Data:

Density 20 °C (68 °F)	1.00 g/ml
pH-value	7.0 - 8.0
Ionogenity	anionic

Hints:

Storage

Secapur Perfect is not sensitive to frost, but storing it for a longer period at temperatures below 0 °C (32 °F) it becomes viscous and can even solidify. It is fit for use again after thawing without any loss of quality. Keep container tightly closed. The product can be stored for at least 24 months in its original sealed packing.
