

THIS MUST BE  
WHAT PARADISE  
SMELLS LIKE

## PRO-FIT FUSION

Fabric softener with strong  
odour capturing properties and  
an intense tropical perfume

**STRONG ODOUR ERADICATING EFFECT**

**LONG-LASTING EFFECTIVENESS**

**SOFT ON DELICATE TEXTILES**

## ODOUR CONTROL

Everyone wants to **enjoy fresh clean linen**. However, sometimes unpleasant odours keep lingering in textiles such as human or animal odours and smoke odours even after washing the textiles several times.

## PERSISTENT MALODOURS

Storing (seasonal) clothing in plastic bags can cause **mold or mildew** as plastic bags trap moisture leaving a **musty smell**.

After a house fire, untouched curtains and other textiles can have a foul **smoke odour**.

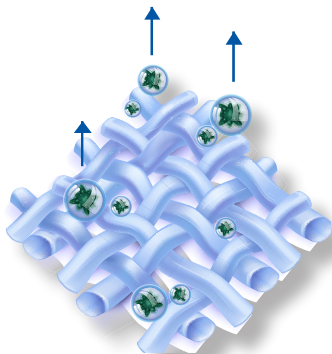

**Animal odours** such as damp fur can linger in carpets and upholstery.

## THE SOLUTION: PRO-FIT FUSION

Pro-Fit Fusion is a softener that is based on the **microencapsulated technology**. This technology consists of molecules that powerfully attract and eliminate malodour molecules.

Once these molecules are trapped, the fragrance molecules are released delivering **instant and long-lasting** effectiveness, even at the end user's site.

## WHICH MATERIALS?

Pro-Fit Fusion has proven efficacy against a broad spectrum of malodours. Not only does it remove **animal odours from carpets**, it also eliminates musty smell from **clothes stored in plastic bags**.

The softener is so effective at capturing odours, that it even works perfectly to eradicate smoke odours from **textiles that have been salvaged from a house fire**. Pro-Fit keeps on freshening, releasing a **sweet tropical scent**.
